

E.THIRTEEN BOXXER BAR CLAMPS

Direct mounting clamps are replacing stems it seems as fork manufacturers increasingly offer this in their designs. This attractive and classy pair from e.thirteen will take standard and wide diameter bars. They offer a slight rise but not too much, and a range of bolting holes to suit everyone. Material is the highest quality, so too is the finish. The end is near for twisted stems.

Price: £74.00

E.THIRTEEN CROWN CHAINWHEEL AND BASHGUARD

There's nothing more frustrating than bent chain teeth or bendy aluminium devices that mess up when you come up short. The Crown chainwheel from e.thirteen is engineered for 3 piece BMX type cranksets, and allows perfect chainguide set up by mounting the bashguard directly onto the chainwheel. This makes for an elephant resistant setup, no hook up's, no bending and importantly no spider. 7075 T-6 is quite possibly bullet proof and the injection moulded impact-modified Makrolon bashguard one of the must have's at the moment.

Price: Crown Chainwheel £36.95, Supercharge bashguard £27.95
