Periosteum. Windsor Locks Public
Schools BOE The skeletal system is
the body system composed of
bones, cartilages, ligaments and
other tissues that perform essential
functions for the human body. Bone
tissue, or osseous tissue, is a hard,
dense connective tissue that forms
most of the adult skeleton, the
internal support structure of the
body. In the areas of the skeleton
where whole bones move against
each other (for example, joints like
the shoulder or between the bones
of the spine), cartilages, a semi-
rigid form of connective ... 6.1 The
Functions of the Skeletal System -
